

Early detection is

# cancer's worst enemy.

I fight cancer every day. I'm a Gynecologic Oncologist. I hope I never see you as a patient. But if I do, earlier is better than later. I don't want you or a loved one to find out too late. I have partnered with the Cancer's Worst Enemy<sup>SM</sup> Team. We are committed to eradicating cancer everywhere.

*There are nearly 100,000 new gynecologic cancer cases diagnosed every year in the U.S.*

If you have these symptoms, they could be related to a gynecologic cancer:

- Abnormal vaginal bleeding or discharge
- Pelvic pain or pressure
- Abdominal or back pain
- Bloating / Trouble eating or feeling full quickly
- Feeling the need to urinate urgently or often

There are many other ways to detect cancer early. Go to [CancersWorstEnemy.com](http://CancersWorstEnemy.com) now and take the free, online risk assessment test and get the facts about gynecologic cancer. It could be 3 minutes that save you a lifetime.

“I do one thing, and I do it with a vengeance.  
I fight cancer.”

— Dr. Karen Finkelstein
